# Orientation Session

📌Learning's,...

- Maintain a good **CGPA**.

- If improving your **CGPA** is not possible, enhance your **resume** by undertaking various projects, participating in hackathons, or completing internships at companies.

- Maintain **consistency** and start a 100-day coding challenge.

- Improve your English communication skills.

Product-based companies sell physical or digital products, while service-based companies provide services to clients in exchange for fees,...

- Initially, entering the IT sector is crucial, after which your **experience** becomes significant. Subsequently, your CGPA or the college you graduated from will no longer be of primary concern.

Fintech, short for financial technology, is a term used to describe companies that use technology to improve and automate financial services and products for consumers and businesses. Fintech companies can include banks, nonbank financial institutions, start-ups, growth companies, and cross-sector firms.

- Typically, these companies inquire about projects you've listed on your resume. Your resume should include two development-based projects and one machine learning-based project. Ultimately, you will be doing development work in these companies.

- Product based company's always ask DSA(Data Structures and Algorithms) Questions,...& They also ask you Aptitude based Questions...

- Imp

  - DSA - Questions (4Months)

  - DEVELOPMENT - Projects (5Months)

  - APTITUDE - Test's & Communication

  After This 3 things apply in bulk, in all majority company's,...

- Always aim higher, especially when it comes to your salary package. Don't lower your expectations just because you're having difficulty finding a good job.

- Maintain a five-year plan and believe in yourself. You have the potential to rank amongst the top 1-5% in the IT sector.
